I am writing to express my interest in the Senior Wordpress Backend Developer position. As a Computer Science Engineer with over 19 years of experience, I specialize in building custom solutions with PHP, JavaScript, and advanced WordPress architectures.

Over the past years, I have worked remotely with clients and digital agencies in Spain and the US, delivering custom WordPress plugins, themes from scratch, and tailored WooCommerce stores. My core focus is writing clean, efficient PHP backend logic, creating dynamic frontends with modern JavaScript, and optimizing websites to achieve top loading speeds and strong Core Web Vitals scores. Additionally, I use AI-assisted coding tools to speed up debugging, refactor legacy code, and deliver reliable features faster.

I am comfortable collaborating with agile remote teams and solving complex technical issues independently. I would welcome the opportunity to discuss how my WordPress and PHP/JS background can help your projects succeed.

Thank you for your time and consideration.

Best regards,

Yoelkys R. Rodríguez González
